# PRODUCT BROCHURE

Outdoor Clocks | Clock Towers | Roof Turrets | Pillar Clocks | Street Clocks

# OUTDOOR CLOCKS

SUPERIOR QUALITY

The design and craftsmanship within our outdoor clocks creates a spectacular feature that raises the visual aspect of any building. A superior finish is a result of 30 years experience and skill using the highest quality materials. Relentless attention to detail and the finest double thickness 23<sup>1/2</sup> carat gold leaf ensure superior and long lasting quality for years to come.

Our clocks are traditionally styled yet supported by the advantages of modern precision mechanisms and electronic control systems. Our state of the art clock control system will advance the clock to the correct time following any mains power failures or BST/GMT changes.

# CLOCK TOWERS

QUINTESSENTIALLY BRITISH

Clock Towers have played an important role in British heritage. Providing a local focal point and of course, displaying time.

Our clock towers feature a stunning woodgrain finish replicating the master Ash patterns in order to create and add character to any building.

The traditional designs are proportionate to our range of exterior clocks, complementing and emphasising their beauty and finish. We offer a range of styles, finishes and colours along with bespoke detailing to add a distinctive elegance to any home or building.

Working together with our clients we will tailor the design of the clock tower in line with their requirements. Our clock towers are traditional and distinguished in style yet complete with modern reliable clock mechanisms and state of the art electronic control systems.

# ROOF TURRETS

A roof turret raises the profile of any home or building, featuring the unique woodgrain from our original Ash master patterns. Our roof turrets can be produced in any colour and even an optional secondary hand stained finish to accentuate and highlight the detailed woodgrain. Meticulous and dedicated craftsmanship produce a stunning feature soaked in style and character. Three traditional styles are available featuring false louvre or plain recessed sides.

# STREET CLOCKS

Our range of street clocks make a bold statement for any town or business offering an unique and innovative way to present time and increase exposure. We manufacture a range of single and double sided clocks with bespoke detailing available to provide a respectful and dignified way to commemorate or celebrate significant dates. A wealth of experience provides us with ability to tailor your clock to your needs and specifications integrating the feature with any existing building.

# BESPOKE ITEMS

Working closely with our clients we form a partnership between our designers and craftsmen in order to turn an idea or concept into reality. Using high quality materials and techniques we create truly spectacular interior and exterior features.

We strive to achieve an end result which exceeds the customer's expectations.

# PILLAR CLOCKS

Pillar Clocks create a landmark focal point in public spaces, town squares and parks. Often chosen as a commemorative feature, our pillar clocks are tailored to your personal specifications and requirements and incorporating features of importance. A pillar clock can bring together a local community to contribute ideas to help create a timeless feature for the whole area to enjoy. We offer a range of designs but we will work with you throughout to bring yours ideas to reality.

## SUPERIOR TIME PIECES

---

*The finest hand crafted architectural roof features & outdoor clocks manufactured in Hampshire, England by the UK's leading manufacturer.*

*“The only reason for time is so that everything doesn't happen at once.”*  
Albert Einstein

### About Us:

---

As Time Goes By was formed out of the passionate desire of Paul Mordecai to create and produce high quality clocks and architectural features.

As Time Goes By specialise in the design and manufacture of traditional and bespoke features to meet the customers requirements and expectations fashioned by a team of highly skilled craftsman using the very latest materials and manufacturing techniques ensuring quality and longevity.

Over time we have built a solid reputation on trust, innovation and professionalism. With a wealth of over 30 years experience we believe we have the skills to create a product to exceed your expectations.
